RHI Neuropsychology Clinical Director

The Rehabilitation Hospital of Indiana (RHI), Indianapolis, Indiana, seeks a full-time Rehabilitation/Clinical Neuropsychologist to serve as our Clinical Director. The Clinical Director will fill a vital leadership and management role in an innovative and growing Neuropsychology / Rehabilitation Psychology practice.

Over the past decade, RHI has maintained and grown a traditional Neuropsychology and Rehabilitation Psychology practice for in-patient and out-patient treatment. Including the Clinical Director there are 6 Neuropsychologists, 1 Rehabilitation Psychologist, and a Post-Doctoral Fellow. During that same time, we have conceived of, proven and operationalized treatments and programs for out-patients with brain injury, including: the Brain Injury Coping Skills Group, Couples Care, a growing Post-Concussion program, and a statewide Brain Injury Resource Facilitation program funded by Indiana Vocational Rehabilitation Services. Under the auspices of an ACL grant, we are extending Resource Facilitation to brain injury patients as they are discharged from area hospitals. Under a new DOJ grant, we will be providing interventions to offenders with brain injury prior to release, following with a year of Resource Facilitation post-release.

This Clinical Director is a critical participant in maintaining quality and ensuring ongoing innovation. To that end, the Clinical Director will:

- Provide leadership and management oversight to our in-patient and out-patient practices.
- As a member of our Leadership Team, ensure that evidence-based clinical practices are provided. Collaborating with the Director of our Research Training and Outcome Center, evaluate and ensure appropriate quality metrics are employed and evaluated, and appropriate actions are taken resulting from this review.
- Provide Clinical direction in innovation. This will include: ongoing assessment of current services, development of new services in response to identified needs, expert opinion in our interactions with funders/government, and ensuring that the practices employed by our staff in their interactions with people with brain injuries and their families are appropriate and effective.
- In collaboration with the Director of the RHI Research Training and Outcomes Center (RTOC) Participate in research as PI CoPI, and/or identify and develop other interested Psychologists.
- Ensure the maintenance and growth of RHI’s Post-Doctoral program.
- As it is desirable to maintain a connection with clinical care, the Clinical Director will see patients at a level that is sustainable in light of other duties.

Competitive applicants will possess a PhD/PsyD from an APA-accredited doctoral program and will have internship (APA-accredited), have completed a post-doctoral fellowship in neuropsychology or rehabilitation psychology, and a minimum of 2 to 5 years of experience in clinical neuropsychology or rehabilitation psychology. Leadership or program management experience in Neuropsychology or Rehabilitation Psychology strongly preferred. Licensure/eligibility for licensure in Indiana is required. The position affords a competitive salary commensurate with experience and benefits.

For additional information please contact Peter Bisbecos, Executive Director Neuropsychology and Resource Facilitation at peter.bisbecos@rhin.com or 317-408-0927. To apply please submit your application, CV, and letter of interest via the RHI website (www.rhin.com).
